SUMMARY

Backend Developer with 4 years of experience designing robust APIs and distributed systems. Expert in Python, Node.js, PostgreSQL, and microservice architecture. Strong focus on system design and performance.

TECHNICAL SKILLS

Python, Node.js, Java, REST API, SQL, PostgreSQL, Docker, Git, System Design, Kubernetes, Redis, Microservices, gRPC, AWS, Message Queues

WORK EXPERIENCE

Backend Engineer

Swiggy (Bundl Technologies) | 2021 – 2024

- Designed order management microservice handling 1M+ orders/day.
- Implemented event-driven architecture with Kafka reducing coupling.
- Improved PostgreSQL query performance by 70% with indexing strategies.

Software Developer

HCL Technologies | 2020 – 2021

- Built REST APIs in Node.js for retail inventory management.
- Integrated Redis caching layer reducing DB load by 45%.

EDUCATION

B.Tech, Computer Science – CUSAT, 2020

PROJECTS

- DistributedQ – Lightweight task queue built on Redis Streams
- GraphShield – Rate-limiting middleware library for Node.js APIs

CERTIFICATIONS

- AWS Certified Solutions Architect (2022)
